"A Different Sort of Tailoring-A Better Sort."

ANNOUNGEMENT

E beg to announce to the well-dressed men of Washington 41 of our new Tailoring establishment,

where exclusive fabrics and thorough service will tend to produce a higher type of clothing.

> Your attention is directed to our display of Spring and Summer Woolens.

Armstrong & Goldstein.

1314 G STREET NORTHWEST.

Do You Like Honest, Square Dealing?

Dr. Pierce's world-famed medicines are put out under the belief that publicity is the best possible guaranty of merit, and that the most intelligent people generally want to know what they take into their stomachs, whether it be as food, drink or medicine. Although it was a bold step to take, and quite out of the usual practice of makers of proprietary medicines, yet Dr. Pierce, some time ago, decided to publish broadcast and on all his bottle-wrappers all the ingredients entering into the composition, or make-up, of his celebrated family medicines. A square deal is therefore assured every one using his medicines, for one knows exactly what he or she is paying for when purchasing them, since every ingredient is published IN PLAIN ENGLISH on the bottle-wrappers AND THE CORRECTNESS OF THE SAME ATTESTED UNDER SOLEMN OATH. These several ingredients are selected from among the very best known to medical science for the cure of the various discases for which these medicine are recommended.

The most eminent and leading from such unprincipled imitators as medical teachers and writers of all might be piratically inclined. the several schools of practice have The preparation of these medithat health is too sacred a heritage to be experimented with, and that PEOPLE SHOULD NOT TAKE medicines. IN DISPUTE WITH MASTERS ABOUT \$18,000 OFFERED FINANCIAL

Be No Strike.

Award of Arbitrators, Make Public a Chairman of the Building Committee Interest in Visit of Gen. Botha-Month Ago, Follows Disagreement

of Long Standing.

After a long session last night at the ton passed resolutions pledging aid to the Local Union No. 5 of the Journeymen Plumbers and declining to send back to arbitration the questions in dispute between the journeymen and the master plumbers. It is not believed that this action will result in any strike or lockout or other serious disturbance of the building trades in Washington.

The history of the disputation goes back more than two years to the dispute between the journeymen and the masters in the plumbers' trade. This matter was fought to the point of a lockout by the master plumbers, and after the dispute had dragged on for about a year it was referred to arbitration. This was the last important move in the dispute. The deision of the arbitrators was handed down just a month ago. It was not a decisive victory for either side, but the workmen held that they had been given the worst of it. However, they agreed to the award as they interpreted it, and the men in all the building trades have since been at work.

The master plumbers were not satisfied, however, with the interpretation of two sections of the award as given by the journeymen and wished to send it back to the arbitrators. The point in dispute was the old one of the open shop. The interpretation of the wording of sections live and six in the award was in doubt.

Points in Dispute. The working plumbers insisted that it meant that Local No. 5 should have the meant that Local No. 5 should have the right to say whether a union plumber should or should not work on a building with a "scab" plumber. The master plumbers held that the award left it optional with the individual plumbers whether or not they should work on a building with a non-union man. This, the journeymen declared, would have been simply a decision in favor of an open shop.

Trades Council, made up of the journeymen, nevmen plumbers to live up to the award the same of the master plumbers.

A copy of these resolutions will be drafted to be sent to George C. Hough, the secretary of the Master Builders' Association.

Master Plumbers Satisfied.

The master plumbers, on the other hand, profess to feel perfectly satisfied with the outcome of arbitration. Several of the members stated to a reporter for the Star that "Golden Medical Discovery" and they are satisfied with the situation as it now stands, and they propose to "stand pat." This may mean that so long as the fourneymen plumbers are at work the mas-ters are satisfied, and that they will agree to any action of the Master Builders' Association. But none of the master plumbers would go into details as to just what action they would take in case the journeymen refuse to refer their dispute to the arbitra-

PLEDGES AID TO UNION OFFER TO BUY CHURCH LONDON'S VIEW OF IT

Building Trades Alliance Sup- Colored Congregation Willing to How Financiers Regard Drop in Take the Northminster. Consols.

clined to Protest.

Makes a Statement-Need for New Structure.

The recent offer of a sum approximating Corcoran building the representatives of \$18,000 for the property of the Northminthe Allied Building Trades of Washing- ster Presbyterian Church, N street between agent, who, it is understood, was representing a colored congregation of this city, has caused the residents of the neighborhood to protest. It is stated that should a sale be attempted by the membership of the Northminster Church to other than a white congregation the residents in question will endeavor to prevent the consummation

A number of the members of the Temple Baptist Church, at 10th and N streets, about half a block from the Northminster Church, have, it is stated, agreed to enter an emphatic protest against the sale of the neighboring church edifice to a colored congregation.

Statement by Mr. Williamson. When Rev. George P. Wilson, pastor of

Northminster Church, was seen last evening by a Star reporter relative to the proposed sale he referred the caller to Mr. L. Cabell Williamson, chairman of the building committee of the church.

Mr. Williamson explained that an offer had been made by a local real estate agent for the church property for a sum amounting to a trifle less than \$18,000. According to the informattion that Mr. Williamson had at hand the offer was made on behalf had at hand the offer was made on behalf of a colored congregation of this city. The alleged protests of many of the people residing in the neighborhood were called to the attention of Mr. Williamson, and he stated that he does not believe that the members of the congregation, should the matter be placed before them, would ratify any contract selling the present church edifice to a colored congregation.

As far as he is concerned, Mr. William-son added, the people of the neighborhood should be treated as the people of the Northminster Church would want others to treat them, and he does not think the selling of the church property to a colored congregation would be living up to the rule of "Do unto others as you would have them do unto you.'

Matter of Repairing Building. In answer to an inquiry, Mr. Williamson

stated that the matter had been discussed about one month ago, when it was decided to repair the Northminster Church building. Several questions were considered at the time, and more than one member of the congregation was of the opinion that the church leaders should cast their eyes about the city in the hope of finding a corner location that would be more suitable to the needs of the congregation as now constituted. A short time after that termination became known, Mr. Williamson explained, the offer was received from the real estate agent in question as representing a colored congregation. The Northminster Church is a consolida-

tion of the North and Assembly's Presbyterian churches, which were united last year. would unite with the congregation of the New York Avenue Presbyterian Church, in furtherance of the hope of Mr. Justice Harlan and other leading Presbyterains of the capital city to found here a great Pres-byterian church that would be a fitting representative of the people of the states followers of the faith laid down by John Calvin. After the plan of uniting the churches mentioned was dropped the Assembly's Church was sold for \$25,000, and shortly thereafter the congregation united the North Church under the name of the

Northminster Church. The old North Church had for its pastor Rev. Charles B. Ramsdell, who died suddenly while the negotiations for the consoldenly while the negotiations for the consolidation were in progress. It is stated that the Northminster Church is much in need of repairs and that the members of the board of trustees believe that by selling the present property and using the \$25,000 re-ceived for the Assembly's Church a superior church building in a more desirable locality

RE-ELECTION ASSURED

MRS. DONALD McLEAN TO HEAD D. A. R. ANOTHER TERM.

Interest Centers in Other National Officers-The Probable Nominations -Meeting Tuesday.

It is understood in D. A. R. circles that at the next continental congress Mrs. Donald McLean will be unanimously re-elected to succeed herself as president general. The real interest, therefore, in the election centers in the other national officers.

Mrs. McLean's friends, it is stated, will nominate at the coming district conference to be held at the New Willard Tuesday evening next the following ticket of prominent women who are warm supporters of the present administration: For vice president in charge of organization, Mrs. Charlotte Emerson Main, the incumbent: recording secretary general, Miss Elizabeth H. Pierce, the incumbent: corresponding secretary general, Mrs. John Paul Earnest; chaplain general, Mrs. Thomas K. Noble; registrar general, Mrs. Inomas K. Noble; registrar general, Mrs. Amos G. Draper; treasurer general, Mrs. Mabel G. Swormstedt; historian general, Mrs. J. Eakin Gadsby; assistant historian general, Mrs. Henry S. Bowson of New York; librarian general, Mrs. Helen M. Boynton; vice president general for the District of Columbia, Mrs. Ellen Spencer Mussey, at present state regent. It is also stated that Mrs. Howard L. Hodgkins, now state vice regent, will receive the unanimous nomination for state regent, and that Mrs. George P. Smallwood will be unanimously nominated for state vice regent.

CURIOUS MURDER TRIAL.

Dramatic Feature of Remarkable Case Special Cablegram to The Star.

BERLIN, March 30 .- A curious murder trial is on the docket here. It is the case of Johann Friedrich Mueller, who is already under sentence of death for the murder of an eleven-year-old school girl, but who has been placed in the dock to answer the charge of killing a woman, his land-

The dramatic feature of the present charge against Mueller is that during his trial for killing the school girl the prosecu-tor suddenly produced the skull of the landlady and asked the prisoner to place his hand upon it and swear that he had not murdered the woman. Mueller broke down completely and confessed, so it is said. He is also suspected of another crime—the mur-der of a Bavarian telephone girl with whom he had been intimate.

HISTORY OF THE DISPUTATION WHAT MR. WILLIAMSON SAYS NOTABLE CONGRESS IN APRIL

Honors and Receptions Planned for Boer Leader.

LONDON. March 16, 1907. The continued decline in the price of consols, which have now reached a level that is low-water mark since their conversion is accounted by deep-seeing financiers as indication not of adversity but of booming

In all large European centers of industry every penny that can be scraped together is required for financing trade, the requirements of which are all the greater because of the high price to which industrial commodities have been forced by this same activity. Every merchant and manufacturer wants all the capital he can obtain, and, i he has securities in his tin box, brings them out and turns them into the sinews of industrial war. His demands also react on he price of credit in the open market, and enable money dealers who commonly hold large lines of government stock to employ heir resources to much greater profit by financing trade. They also are thus sellers of consols and have been for some time

The decline in consols is thus believed in England to be the culmination of a world-wide demand for capital, which results in the price of money being higher, the yield on investments more satisfactory to the buyer and their price less gratifying to the seller; and a symptom which at first sight looks like an indication of financial sickness translates itself, on examination, into a fresh proof of commercial buoyancy Nevertheless, it is necessarily accompanied by considerable discomfort in financial cir-cles, for a holding of consols is as neces-sary as office furniture to banks and many other credit institutions, and the fall in volves them in losses which made a hole in the rich harvest that they earn from the keen demand for the commodity in which they deal. The banks, of course, can well afford to face the loss involved by this depreciation, but some of the smaller wheels in the machinery of credit have been severely jarred by it, and the situation is not altogether free from anxiety.

The demand for capital also leads to a certain strain on London's store of gold,

and yesterday's fall in consols was to some extent due to fears that the Bank of England, in order to protect its vaults, may be obliged to return to a 6-per-cent official discount rate. However, this may be, London financiers believe it is fairly safe to assert that the present money famine is no mere passing phase. The price of capital is likely to be high-with the result that consols will be low-for some time to come until, in fact, trade slackens its activity and the prices of commodities ease off, thus relieving the money market or the extra burden that is at present imposed on it by the requirements of trade and finance.

Found Guilty of Train Wreck.

for the railway accidents that are always happening in the United States, may be interested in the verdict of a Scotch jury that has just found guilty George Gourlay he engineer of the train that caused th loss of twenty-two lives. Gourlay has been sentenced to five months' imprisonment without the right to appeal.

At the time of the disaster, when Gour-lay's train ran into another, the conditions were a blizzard of unsurpassed severity, a complete breakdown of the block-signaling system, a train derailed on the joint line human instruments frozen and weary. both the station master at Arbroath and the

chief porter told him he was to travel to-ward Dundee "on the caution system," and the warning was repeated by the signalman outside Arbroath, who reminded him of tem was broken down and that a local train start. Under the caution system, with the block signals inoperative, the arms having fallen down, Gourlay should have stopped at every signal until told to go on. Yet after moving out of Arbroath he passed the distant signal without seeing it, but know-ing where it was, and he also passed the

This is the crucial point of the whole were advanced. An engine driver passes semaphore of which the arm is down in obedience to long-formed habit. Gourlay may, therefore, have passed this home sig nal with its drop as a result of habit and day. In that case he committed an error The other possible theory is that he re-solved to "chance it" and drive right into the station, and in that case he was guilty of the criminal recklessness with which he was charged. The jury decided for the lat-ter alternative and found the engineer

British Intercolonial Congress. The fourth British intercolonial congress is to be held in London next month, and the stern stuff to survive all the hospitalities which are being prepared for them here. In addition to the official festivities a number of dinners are in course of arrangement. The Pilgrims will act is their hosts at Claridge's Hotel April 19, while the 1900 Club banquet at the Atbert Hall will also

e a tremendous function. Big as the Albert Hall is, it is not big enough to accommodate all who desire to be present at this dinner. The boxes are already disposed of, and the arena floor seats will soon be at a premium, judging by the way in which applications for seats are pouring in. People who wish to be present at the after-dinner proceedings are to be accommodated in the balcony. Popular interest will be chiefly directed upon Gen. Botha, the new Transvaal pre-mier. South Africans of the imperialist school, of which Lord Milner is now the foremost representative and leader in England, are preparing to give Premier Botha a cordial welcome to the conference. There was some debate as to whether London would include Gen. Botha in the general offer of the honorary freedom of the city to the premiers. It has now been definitely decided to confer the honor on the former Boer commander-in-chief, and a seventh gold casket is being prepared for him.

Strange Habitues of Museum. There is weeping and wailing among the strange folk who frequent the reading

room of the British Museum to such an extent as to suggest that they live there Every subject under the sun is studied in this famous room and some of its habitues have come to regard themselves as belonging to it quite as much as the books them For some time they have been living

For some time they have been living over a sort of volcano. Unofficial hints have been given that the room is to be closed, and at last definite news is forthcoming. The room is to be closed for what may be called its jubilee cleaning and decoration, and it will not be available for the "illustrious study of the world's scholars" until the early days of next winter. The roof and ceiling of the reading room have not been cleaned since the opening of the famous chamber in 1857. room have not been cleaned since the opening of the famous chamber in 1857.

Sir Ernest Cassel bears a strong resemblance to the king. At Bierritz, where Edward is spending a holiday, the knight is constantly mistaken for his majesty. He is the same height, has a similar figure, and although ten or more years younger, the fact is not very perceptible. The king is vastly pleased to have his double so near and there are times when he is very useful.

Looks Like the King. For instance, when the royal party is London laundries con starting out on a motor trip the king fre-

quently makes Sir Ernest drive in advance. By this means the crowd, which frequently watches to see the king, has dispersed by the time his majesty is about to start. No one enjoys more thoroughly than Sir Ernest himse the privilege which is con-ferred upon him and he returns salutations with all the dignity and gravity possible. The famous Massey-Mainwaring collection of jewels, silver miniatures, snuff boxes, procedain furniture and old masters which

procelain, furniture and old masters, which is well known to the public from its having been exhibited at the Bethnal Green and South Kensington museums and from the recent litigation between members of the Massey-Mainwaring family, has attracted large crowds to Christle's auction rooms during the past few days and when the sale begun yesterday there was a great concourse of bidders, representative of the best-known dealers and collectors, both here and on the continent. The lots disposed of consisted of tewels fans and lecconductors. consisted of jewels, fans and lace and produced a total of \$87,310. Several of the jewels fetched sensational prices. A supertemerald, pearl and brilliant necklace was bought by Mr. S. Harris for \$13,500. The bought by Mr. S. Harris for \$13,500. The same purchaser, after a keen fight, obtained possession of an emerald, brilliant and pearl tiara having in the center a magnificent oblong emerald said to be the finest specimen in existence, the closing bid being \$26,000. A Paris dealer, M. Rosenau, paid \$23,000 for an exquisite five-row pearl necklace, composed of 471 graduated pearls, and numerous other items went for hundreds of pounds.

HILL ON WATERWAYS.

Necessity for the Government to Improve Them. NEW YORK, March 30 .- James J. Hill,

president of the Great Northern railway, taking as a text the recent action of President Roosevelt in appointing a waterways commission, said today that through the waterways of the country, properly improved, must come much desired improvement in freight handling conditions. The country, he said, must look to its waterways for immediate relief of the freight pressure. "If the government would improve its waterways and extract from them onefifth of their latent possibilities," said Mr. Hill, "the freight handling problem would speedily be nearer solution than the rail-

Calls for Relief.

"There has been in the past a feeling mong some railroad men that waterway development would be inimical to railway interests. I do not think it would, and if this idea has not already wholly disappeared, it is in a fair way of doing so soon. We realize that we have created in the prosperity of the country a condition that calls loudly for relief, and any means to

ways themselves can ever hope to bring

that end would be welcome.
"Take, for instance, a fifteen-foot chan-New Orleans. There is no more important work for the general government than this improvement. It might cost \$100,000,000, but when it was finished a single powerful towboat could pull thirty to forty trainloads. Heavy freight, requiring only moderate speed in transportation, would go to the seaboard by way of the gulf, and then there would no longer be freight congestion between the east and west."

AMERICANS STILL RESTLESS.

Resolutions Against Cuban Control of Isle of Pines.

HAVANA, March 30 .- The American residents of the Isle of Pines have held a mass meeting at which the following resolution, addressed to Gov. Magoon, was adopted: "We, residents and property-holders of the Isle of Pines, are not, never have been and never will be satisfied with Cuban control. We are convinced that if this control is continued all the American and a majority of the Cuban residents will be compelled to assume the reins of govern-ment of the Isle of Pines."

Shot Judge in Court.

RIPON, Wis., March 30.-Mrs. W. H. Ogden, following the conviction of her husin the court room, shot Justice of the Peace L. E. Nohl, but the bulet was deflected by a checkbook and a pocketbook, saving his life. She fired four other shots, three Charles Kashuba over the heart. He may dle. Mrs. Ogden was arrested.

Slightly Injured.

While Mrs. C. H. Underwood, 1331 Park road northwest, was crossing G street near 11th street, yesterday afternoon, she was accidentally knocked down by a carriage driven by Mrs. R. L. Hoxie, wife of Maj. Hoxie, U. S. A., of 1632 K street northwest. Following the accident, Mrs. Underwood was assisted into Mrs. Hoxie's carriage, and was driven to her home on No serious consequences are expected to

Funeral of Mrs. Harriet Connor. The funeral of Mrs. Harriet Connor, wife of Lendell A. Connor, who died yesterday morning in this city, will take place from

her late residence, 1721 Corcoran street, at 10 o'clock Tuesday morning. News Briefs. One hundred years ago the West Indies supplied about one-half of the world's sugar, but the industry is on the decline.

The world's crop of beet sugar is now about Of every 100 gallons of illuminating oil used in the world, fifty-four gallons are produced in the United States.

Experiments in England have demonstrated that the rainfall at the earth's sur ace is greater than at a point 100 fee

Germany has taken great interest in bee culture of recent years, and the crop is about 20,000 tons per year. Spain is a close second of the European countries.

San Marino is the smallest republic in the world. It has but twenty-two square miles, but has a population of 8,500. Its annual revenues amount to \$15,000 per year. Its army has 900 soldiers and 150 officers.

The total yield of Great Britain is no about 236,000,000 tons per year. The origin of the Great Banks of New-foundland is said to have been in the boulders carried down by icebergs. The bank is 600 miles long and 120 broad.

A Pretty Night Dress

attractive and becoming as miladi wishes, and a suggestion for one which is a bit unusual in its yoke effect is shown. Many like the short-length sleeves, and those in this gown may be either long in bishop style or ending at the elbow. The yoke, being round in back and in tab effect in front, lends well to the use of embroideries, which come by the yard from one to three inches come by the yard from one to three inches wide. A combination of heavy and light embroidery or lace often proves a most pleasing contrast and is much favored by particular women. Groups of narrow tucks complete the adornment in front and lower the line of fullness in a becoming manner. Muslin, nainsook or other lingerie material may serve, of which 6½ yards 36 inches wide are needed in the medium size. 6832—Sizes 32, 36, 40 and 44 inches bust

ANCIENT MANUSCRIPTS.

Interesting Discovery Anticipated in Research in Armenian Life.

Special Cablegram to The Star CALCUTTA, March 30 .- It is just possible that a very interesting discovery of ancient manuscripts will be made in the near future. As one result of the visit of the ameer to Calcutta attention has been directed to a small community of Christions from Armenia, who have been living in Cabul for very many generations. These people in the time of the late Ameer Abdur Rahman had dwindled down to ten families. They were, for reasons unknown, banished to Peshawar, and brought down with them immense value and antiquity. Indeed they are so old that none of the families pos-sessing them are able to read them.

It appears that the priesthood had died the community was too remote to be able tional history of Armenia reference is made to an "Afghan" country where the early Christians found a refuge from persecution 'Afghan" country was meant the mountainous regions in the vicinity of Georgia.

BOMB MADE OF CAVIAR.

Polish Gentleman Startled Over Mysterious Package.

Special Cablegram to The Star. PARIS, March 30 -- A Polish gentleman with a long experience of bombs in his native country, which some years ago he left for Paris, the other day put in an appearance at the police station agitated with fear. He had received a parcel containing a small barrel clamped with iron, which was obviously an infernal machine. Several policemen used to handling dynamite were at once sent round to the Pole's house and carried the bomb away with due precautions to the municipal laboratory of chemistry, which is fitted up for the exami-

nation of such engines. The machine, gingerly manipulated, was put into a pail of water and finally opened with every care. It was found to contain a greenish-black oily substance, consisting of small round pellets in a thick liquid. A chemical analysis was being begun of a small fragment of the unknown matter when an assistant in a flash recognized it The murderous engine was only a bomb caviar, which is, of course, indigestible, but not otherwise deadly. Manipulation in the laboratory, however, had rendered this par-
